The chemical industry of Uzbekistan

Uzkinmyosanoat SJSC
**List of main exporting products**

- Ammonium nitrate
- Urea
- Ammonium sulfate
- Ammonium Sulfate phosphate
- Suprephos
- Nitric-phosphoric fertilizers
- Superphosphat
- Ammoniac
- Nytron fiber
- Acetic threads
- Acetic acid
- Fluid chlorine
- Sodium chlorine
- Chlorine magnesium defoliant

- Diacetate of cellulose
- Cellulose
- Plastic pipes
- Polyethylene film
- Methanol
- Sodium metallic
- Formalin
- Concentrated nitric acid
- Non concentrated nitric acid
- Ammoniac water
- Methyl acrylate
- Nytril acrylic acid
- Polyacrylamide
Main trends of chemical industry development

- Modernization and technological rearmament of existing production of mineral fertilizers.
- Optimization of assortment of mineral fertilizers.
- Construction of modern production with phased output of outdated powers.
- Making the production of new scientifically based types of chemical product for home market and export.
- Mastering the production of non-explosive types of nitric fertilizers.
## Shares of enterprises, offered for sale to foreign investors

Foreign investments attraction Program

The total amount of attracted foreign investments – 950.36 ml USD
Gained results from the Program

- The volume of production of marketable products will increase from 341.8 billion soums (306.5 ml USD) in 2004 up to 762.2 billion soums (683.6 ml USD) in 2010.
- The working reliability of ammonia production units will increase.
- Power consumption of ammonia units would decrease 1.3 times.
- The volume of urea production will increase up to 1.3 times or 420 thousand tons/year.
- Production of phosphoric fertilizers will grow up to 200 thousand pure P2O5.
- The export potential of branch will increase.
Thank you
